

Calculator Project

A simple command-line calculator built using Python.

Features

- Addition
- Subtraction
- Multiplication
- Division
- User-friendly menu

Technologies Used

- Python 3

How to Run

1. Clone the repository:

```
git clone https://github.com/Sivaprakasam552/calculator-project.git
```

1. Open the project folder.

2. Run the program:

```
python calculator.py
```

Sample Output

```
1. Add
2. Subtract
3. Multiply
4. Divide
5. Exit
```

```
Enter choice: 1
```

```
Enter first number: 10
```

```
Enter second number: 5
```

```
Result = 15
```

Future Improvements

- Scientific calculator functions
- GUI using Tkinter
- History of calculations
